THERE'S A BETTER WAY TO BUY...

eshop.qubicaamf.com

Managing orders for your center can be frustrating. You lose time hunting down part numbers, risk spending money on the wrong parts, and then still need to juggle when you have placed multiple orders.

**There is a better way to buy ... QubicaAMF eShop.
Amazingly easy.**

By taking orders on the phone, we've spent thousands of hours understanding your challenges. We've matched that with the largest research and development team in the industry, designing the best site in bowling around your needs. By taking our expertise, and combining it with the kind of features you'll find on Amazon, we've put together a site that will blow you away.

QubicaAMF  eShop
AMAZINGLY EASY

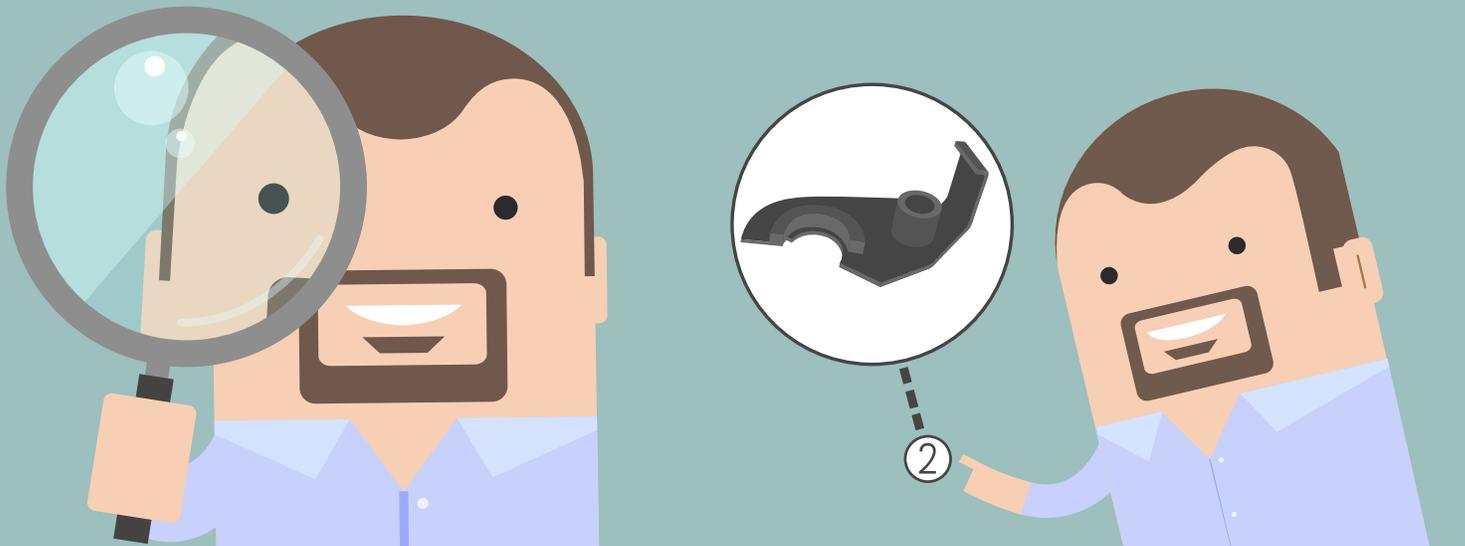

- Find the parts you need quickly
- Order the right parts
- Manage all your purchases efficiently

FIND THE PARTS YOU NEED QUICKLY

Time is money, and we know you can't waste either looking for parts. Don't let scraps of paper with smudged numbers or a mechanic on vacation slow down your ability to get parts. You can use the eShop to find the parts you need quickly.

You can even use commonly referred to phrases like "pork chop" or "toilet seat" to find parts quickly!

You might know you have an XLi EDGE machine, so from there, use the menus to navigate your way down to the bolt or belt you need.

If you've got a belt that's wearing or feel like a screw is loose, you can click the bubble and picture of the identified part to pull up a picture and part description.

EXCLUSIVE SMART SEARCH.

Just like Google, we're making it easy to look up parts. You can have a partial part number or a short description, and just key it in. And let's be honest, we don't always use the "proper" name.

EXCLUSIVE DRILL DOWN MENUS BY MACHINE TYPE.

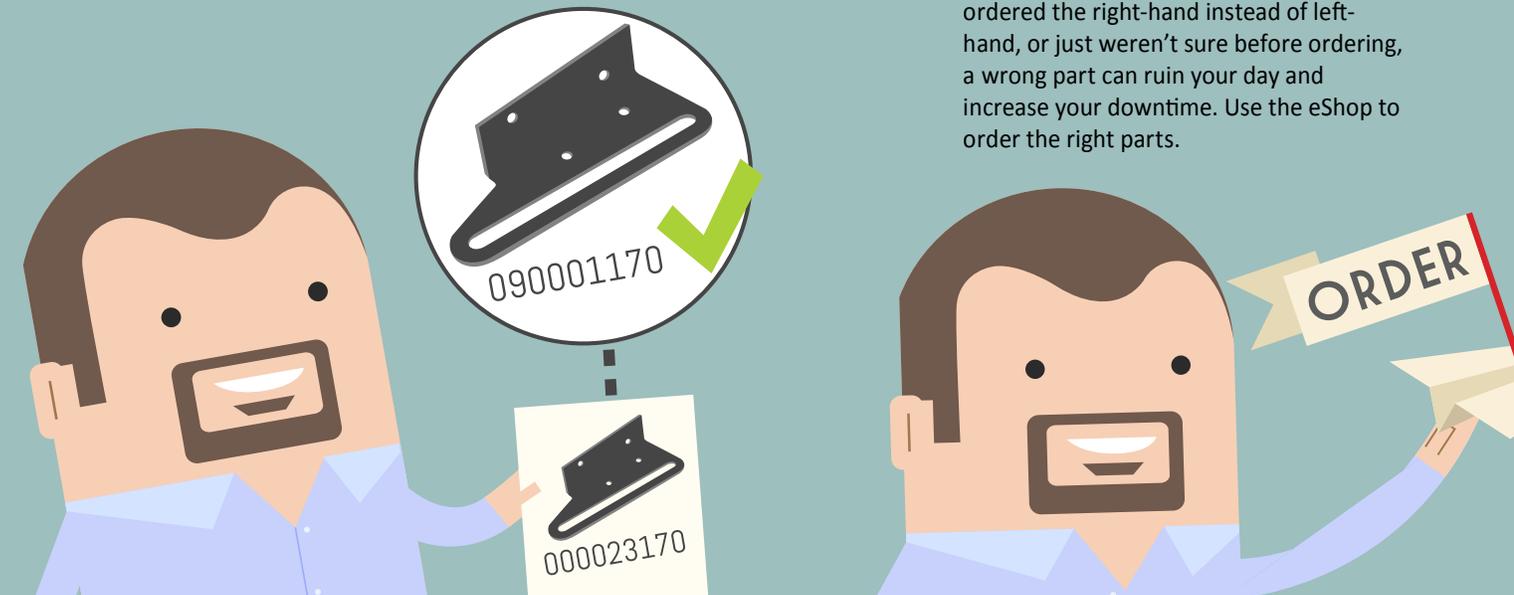

It's a special type of mechanic who knows all the assemblies of a machine by heart...for the rest of us, we have drill down menus! Start at the section of the machine, and then move to the assembly. These menus will be much faster than a manual, and you'll still have the assembly drawing to help you find the part you need.

ASSEMBLY DRAWINGS WITH HOTSPOTS.

Let's say you're working on a machine, need a part number, and know where it is, but not what it is. We've got that covered. Use our assembly pictures with hotspots to find the part you need much faster than finding the manual. You can still get all the details, plus see other parts in the assembly while you're looking things up.

ORDER THE RIGHT PARTS

Nothing ruins your day like opening a box, taking out your newly ordered part, and then realizing it's not the right one. Whether you had too many zeroes, ordered the right-hand instead of left-hand, or just weren't sure before ordering, a wrong part can ruin your day and increase your downtime. Use the eShop to order the right parts.

The illustration shows a man on the left talking on a phone. A magnifying glass is positioned over a part with the number 090001170 and a green checkmark. On the right, the same man is holding a paper airplane with the word 'ORDER' written on it. Below these elements are three screenshots of the eShop interface.

The top parts in the eShop have multiple angles, and we're adding more pictures each day.

After you make a purchase, that order will be in your history for the next time you need it.

Whether it's keywords or products, you'll also have search history at your fingertips.

THOUSANDS OF HIGH-QUALITY PHOTOGRAPHS.

Photos make all the difference when you're ordering online. Can you imagine ordering on Amazon without a picture of the tools you're going to buy? We're making sure you have access to thousands of photos so you know you're ordering the right part, every time.

UP-TO-DATE CROSS-REFERENCES.

Let's say you're working on a Frankensteined-machine - it's an 8270 and that has had some upgrades along the way. When you look up the part, you'll see any changes or replacements immediately, thanks to our up-to-date cross-references.

PART VALIDATION.

Part numbers aren't always the easiest to remember, especially with all those zeroes. As you type, we're validating with suggestion messages. Combined with cross-references and related parts, you'll find what you need in the eShop!

MANAGE ALL YOUR PURCHASES EFFICIENTLY

You're juggling customers, payroll, food orders, and more. We've got your back with our eShop so you can manage your purchases from QubicaAMF easily and efficiently.

You still get the power of suggestion with our validation messages, plus updates when there's a replacement.

For those monster orders, you can upload up to 750 lines using our handy Upload tool.

Just add your items to the cart, and you'll see your extra savings automatically.

Add users and grant them the permissions they need. (Browse only, Order approval or Purchase)

QUICK ORDER AND UPLOAD FEATURES.

So you're a rock star with part numbers, and you've got your list in hand. Key in the part numbers, hit enter, and relevant information pops up, like the name, availability, and price. With the upload feature, eShop will read the order, tell you about backorders or replacements, and add everything to your cart – easily and efficiently.

HOUSE BALL AND RENTAL SHOE ORDER FORMS.

We took an easy process, and made it even easier! You just enter in the quantities for your house ball and rental shoe needs - you don't even have to remember part numbers. And when we have house ball and rental shoe specials, the eShop takes care of your savings for you.

USER PROFILES FOR PURCHASING APPROVALS.

It takes a lot of people to make your bowling center run like a well-oiled machine. With eShop you can add users to your account who can build carts or lists throughout the day. Imagine – by the time you sit down for a quiet moment at 2 am, there's a parts order waiting for you, and all you have to do is add to cart and checkout. It's that simple.
