

EDGE

STRING

THE AMAZINGLY
SIMPLE WAY TO
OFFER BOWLING

Say Hello to **EDGE String**

The #1 Selling String Machine in the World

Say hello to a new era of bowling – one where you no longer struggle to find qualified technicians, your pinspotters don't break down for extended periods, and lanes stay open. An era where your center saves thousands of dollars per lane every year and you sleep well at night knowing the good times will keep on rolling.

EDGE String

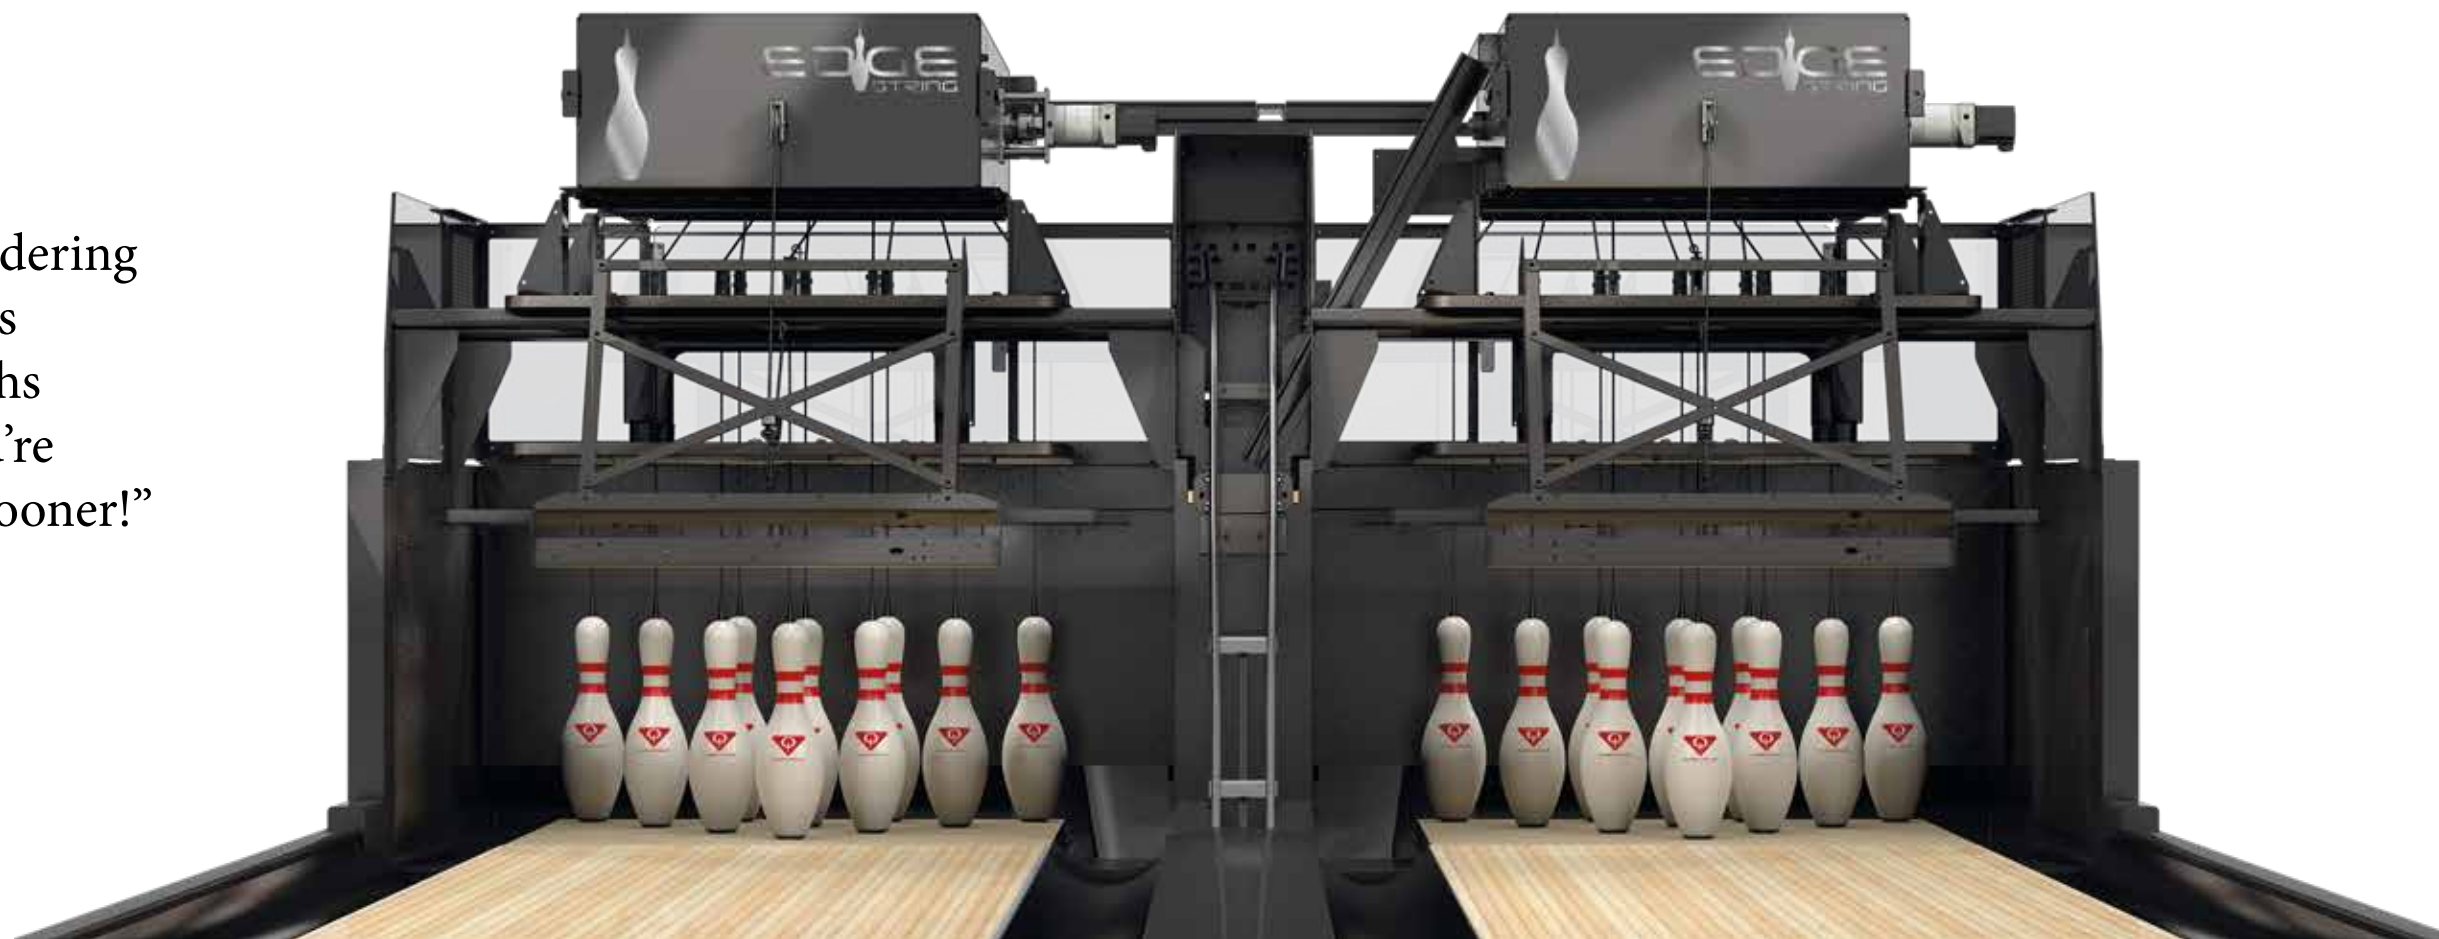

The Amazingly Simple Way to Offer Bowling

- **Amazing Bowler Experience**
- **Simple & Carefree Operation**
- **Exceptional Performance & Quality**

“

My advice to any proprietor considering a switch to EDGE String machines is to just do it. Two or three months down the road after you do it, you're going to say, man, I wish I did it sooner!”

Will Mossontte
Owner
Empire Bowl, CA

USBC-Approved,
with pinfall action and
scoring in-line with free-fall

EDGE String was used
at the first-ever PBA event on string
machines. Hear from the PBA bowlers
as they share their experience
of bowling on EDGE String.

Amazing Bowler Experience

The bowling experience on EDGE String is second to none. Pins are very consistently on spot, there's no deadwood, and its USBC-Approved design delivers pin action and scoring in-line with free-fall.

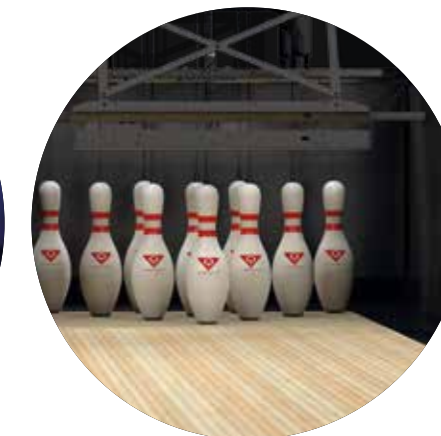

Industry Certified*

EDGE String is USBC and IBF certified, making it the ideal choice for all levels of competitive play.

Full Coverage Pin Shield

Completely hides the pins and strings from view when the machine cycles.

Dark Pit Area

Hides the strings and highlights the pins during play.

CenterPunch Player Responsive Deck Lights

Integrates with Conqueror and BES X to respond to on-lane events, delivering an incredibly visual and engaging bowler experience!

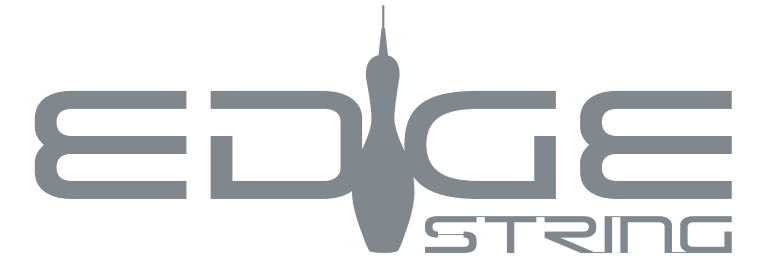

* Two versions of EDGE String are offered. USBC certification is available only with the USBC-Approved version of EDGE String.

“

The experience that we’ve had has been so phenomenal. We can’t imagine it getting any better. It’s comforting for us to know the quality we get from QubicaAMF on these EDGE String pinspotters. They’ll save you time, money and anxiety. They’re virtually stress-free.”

Steve Sherman
Lane Maintenance Manager
Cedar Bowl, UT

Carefree Operation

EDGE String’s simple, robust design means any member of your staff can be easily taught to operate it and it requires very little servicing.

Simple to Learn, Easy to Use

Staff are typically comfortable with basic operation and maintenance within a few hours.

Low Maintenance

Robust design and only three adjustments—with gauges built in so you know they are done right. Plug & Play Design makes replacing components quick and easy.

One-Touch Controls

The intuitive, graphic machine controller – everything you need, at the touch of a button.

Safety in its DNA

Get the best safety features of any string machine and peace of mind for you and your employees. 100% Rear-operation, integrated guarding, and tool kit are included.

“
The Tech Wizard smartphone app
is brilliant! Center teams now focus fully
on our customers instead of dealing with
pinspotting machine issues, and the
bowling experience for our customers
has never been better.”

Carl Boylan
Group Technical Manager
Hollywood Bowl, UK

Carefree Operation

Tech  Wizard

Your staff never has to think about EDGE String
because Tech Wizard will notify & provide guidance
when attention is needed.*

Real-Time Operational Alerts

Informs if there is ever a stop in play,
what the issue is, and what to do, all
while keeping your bowlers updated
on the scoring monitors.

Maintenance Notification & Guidance

Notifies when it's time for service,
what is required, the tools and time
needed and shows how to do it
through instructional videos.

Staff Training Resource

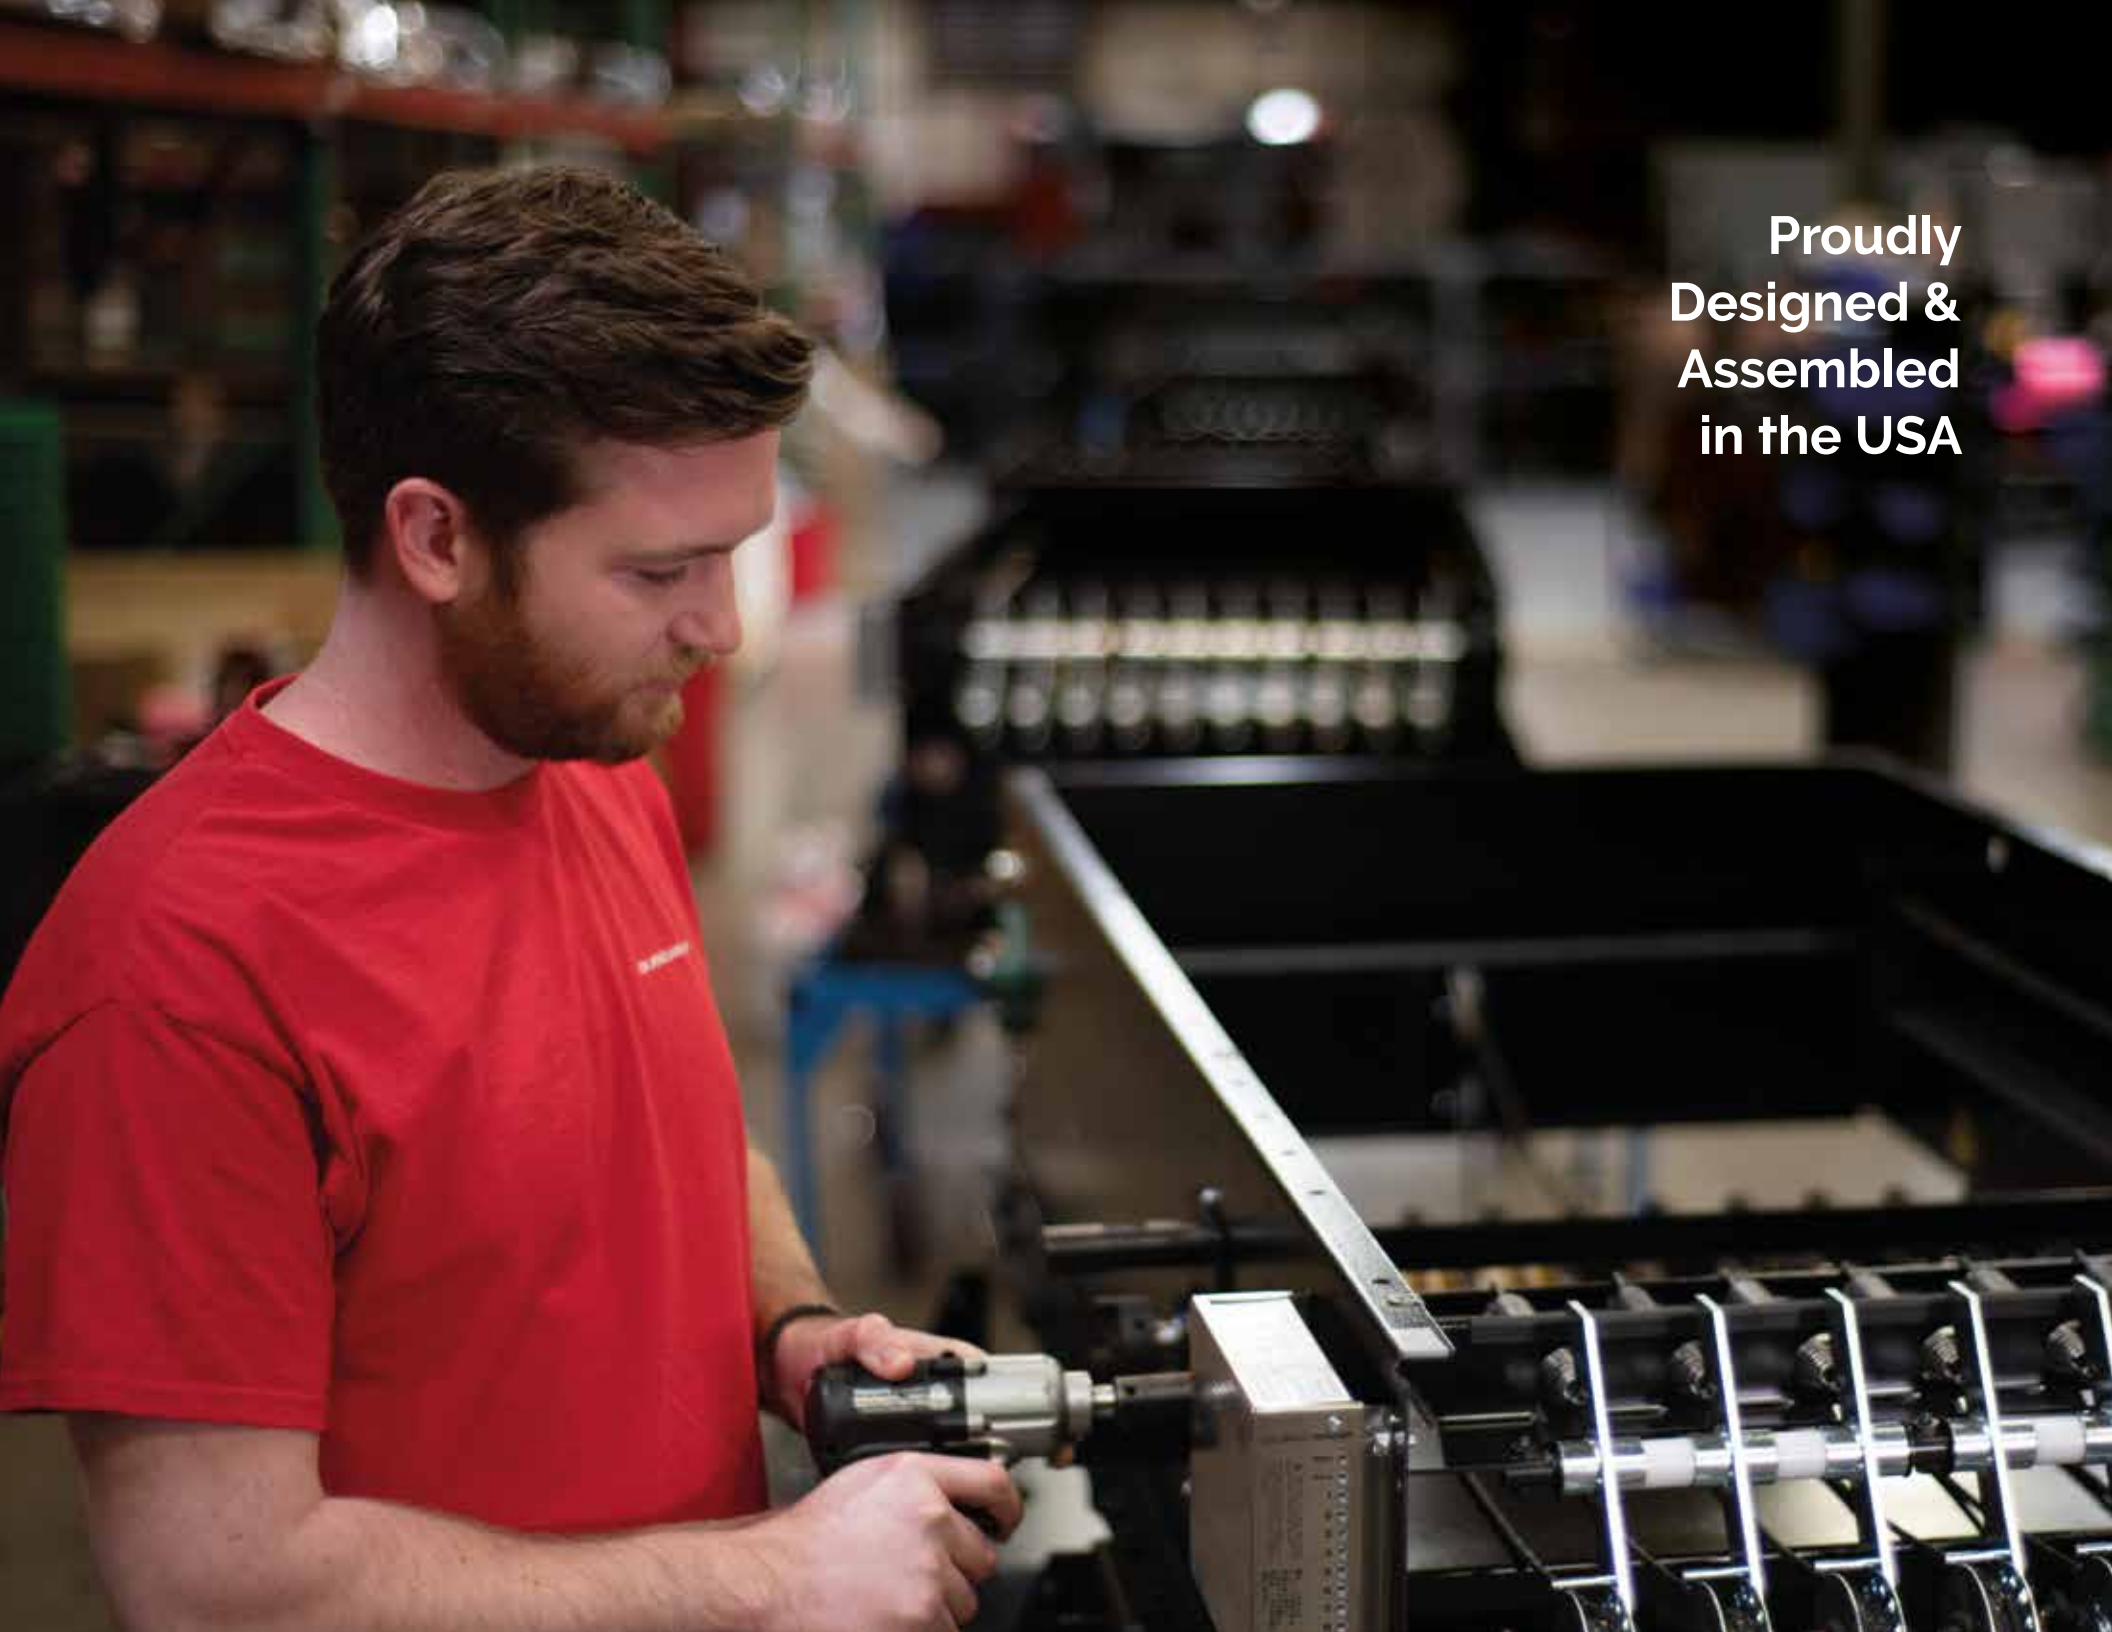

Instructional video content in Tech
Wizard is a great reference and
learning tool for your staff.

Cloud-Based Management Tools

Performance data, service history,
and reporting capabilities are at your
fingertips from anywhere.

* Tech Wizard functionality requires Conqueror X, any tier, with Conqueror Maximization Program (CMP).

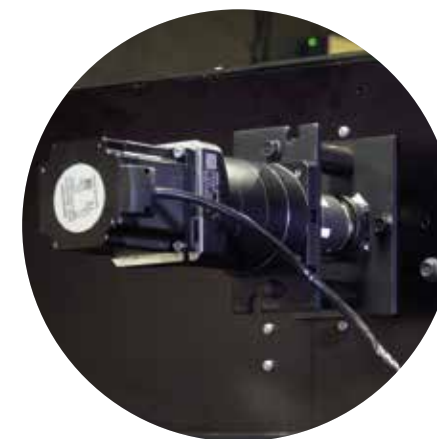

Proudly
Designed &
Assembled
in the USA

Best Performance & Quality

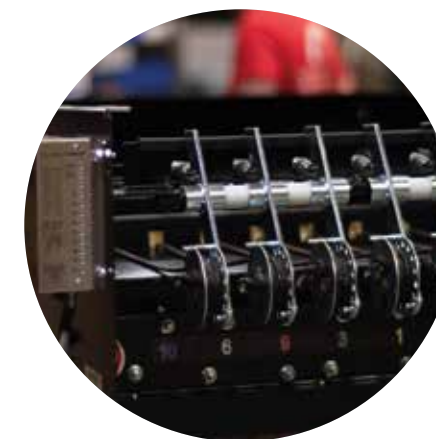

EDGE String combines revolutionary electromechanical design and intelligent software, enabling you to deliver the fun of bowling with peace of mind and at a very low operating cost.

Extreme Low Energy Consumption

State-of-the-art, 24v DC electronics and drive technology means each machine consumes less power than the typical household coffee maker. With the same amount of energy, you can brew 1 pot of coffee or run EDGE String for 3 hours.

Proven Design, Quality Construction

Robust design, built in the USA with high-quality components. EDGE String will do battle with bowlers in high-lineage centers for decades—and win!

Performance Pin Bushing

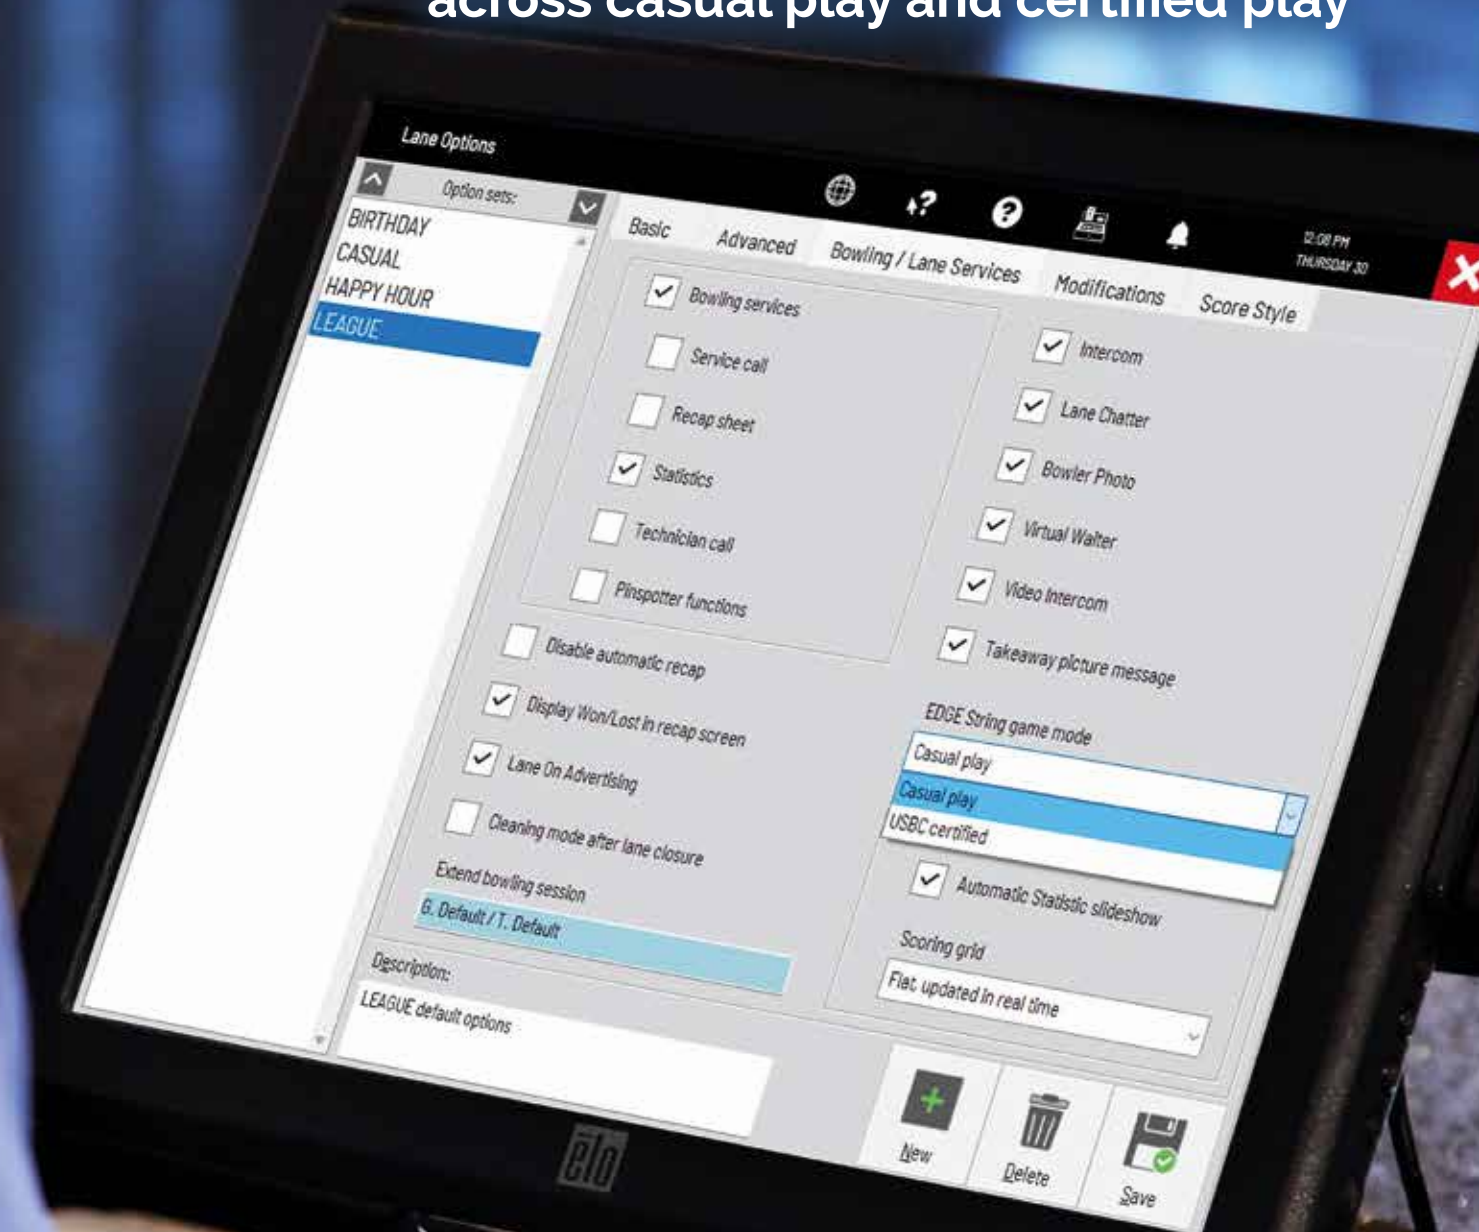

Reduces the occurrence of pin tangles so bowlers keep rolling.

Dual-Action Pin De-Tangler

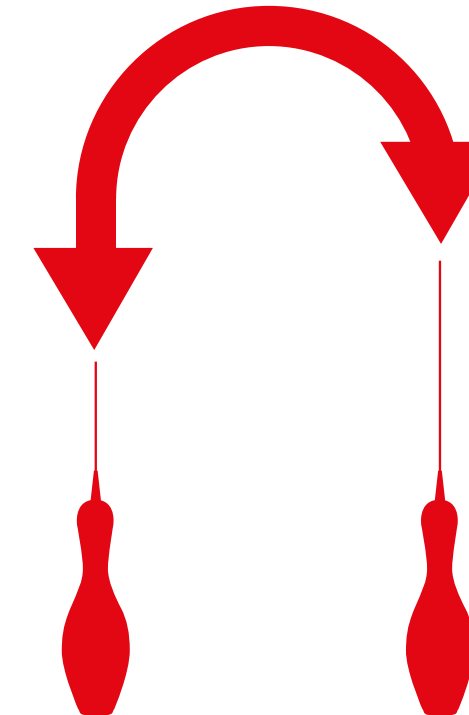

EDGE String's intelligent software targets tangled pins and varies pulling speed and force, enabling EDGE String to resolve most tangles without staff intervention.

Automatically maximize performance reliability
across casual play and certified play

Best Performance & Quality

Adaptive String Length Technology

Adaptive String Length Technology*
Patent Pending

**Automatically shift between casual play
and USBC-Approved play**

EDGE String is the only USBC-Approved string machine made to effortlessly operate at two different string lengths - a longer USBC-Approved length for certified competition and a shorter length optimized for casual play. Why is this important? You benefit from even higher performance reliability with the shorter string length during times when certified play is not needed.

- Host USBC league and tournament play at the USBC-Approved string length, with amazing performance reliability.
- Automatically shorten the strings and enjoy even better performance reliability during casual and non-USBC competitive play.
- Exclusively controlled and automated through the Conqueror X management system.
- Peace of mind - Staff can quickly check the gameplay mode the EDGE String machines are in if asked.
- Tracking - Games bowled in USBC-Approved mode are tagged and available through Conqueror reporting.

* Adaptive String Length Technology is exclusive to EDGE String-USBC machines and requires BES X and Conqueror X (v14.65.01 or higher)

“I understand the hesitance to switch to string machines, but EDGE String is the best decision a proprietor will ever make.”

Rick Novak, Owner
Royal Family Bowling Center, VA

Transformative Investment

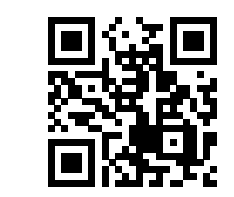

With EDGE String in your existing center or new investment project, you will be blown away by how easy and low-cost delivering the fun of bowling can be. You will enjoy peace of mind, and your guests will love bowling in your center, returning over and over to enjoy authentic bowling fun.

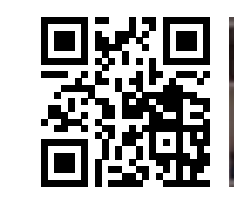

Offering bowling has truly never been as amazingly simple!
